—— Preliminary note on photographs of the spectrum of the nebula in Orion. [1890.] Roy. Soc. Proc., 48, **1891**, 199–201.

—— On the spectra of Comet *a* 1890 and the nebula G. C. 4058. [1890.] Roy. Soc. Proc., 48, **1891**, 217–220.

—— On some points in the early history of astronomy. Nature, 43, **1891**, 559–563; 44, **1891**, 8–11, 57–60, 107–110, 199–202.

—— Physical science for artists. Nature, 44, **1891**, 175–178, 227–229.

—— On the causes which produce the phenomena of new stars. [1891.] Phil. Trans. (A), 182, **1892**, 397–448.

—— On the new star in Auriga. Preliminary note. Astr. Nachr., 129, **1892**, 73–76.

—— On some points in ancient Egyptian astronomy. Nature, 45, **1892**, 296–299, 373–375.

—— The origin of the year. Nature, 45, **1892**, 487–490; 46, **1892**, 104–107; 47 (**1892–93**), 32–35, 228–230.

—— The opposition of Mars. Nature, 46, **1892**, 443–448.

—— On the new star in Auriga. Preliminary note. Roy. Soc. Proc., 50, **1892**, 407–409.

—— Note on the spectrum of Nova Aurigæ. Roy. Soc. Proc., 50, **1892**, 431–435.

—— Note on the new star in Auriga. Roy. Soc. Proc., 50, **1892**, 466–469.

—— The sacred Nile. [1893.] Nature, 47 (**1892–93**), 464–467.

—— The astronomical history of On and Thebes. Nature, 48 (**1893**), 318–320, 371–372.

—— The influence of Egypt upon temple-orientation in Greece. Nature, 48 (**1893**), 417–418.

—— The early asterisms. [1893.] Nature, 48 (**1893**), 438–440, 518–520; 49 (**1893–94**), 199–203.

—— On the photographic spectra of some of the brighter stars. [1892.] Phil. Trans. (A), 184, **1894**, 675–726.

—— The spectrum changes in β Lyræ. Preliminary note. Roy. Soc. Proc., 56, **1894**, 278–285.

—— On the photographic arc spectrum of electrolytic iron. [1893.] Phil. Trans. (A), 185, **1895**, 983–1021.

—— Preliminary report on the results obtained with the prismatic cameras during the total eclipse of the Sun, April 16, 1893. [1894.] Phil. Trans. (A), 185, **1895**, 711–717.
—— On the photographic arc spectrum of iron meteorites. [1894.] Phil. Trans. (A), 185, **1895**, 1023–1028.
—— On the photographic spectrum of γ-Cassiopeiæ. [1894.] Roy. Soc. Proc., 57, **1895**, 173–177.
—— The Sun's place in nature. [1895.] Nature, 51 (**1894–95**), 374–377, 396–399, 565–567, 590–592; 52 (**1895**), 12–14, 156–158, 204–207, 253–255, 327–329, 422–425, 446–450.
—— Terrestrial helium. [1895.] Nature, 51 (**1894–95**), 586.
—— The new mineral gases. Nature, 52 (**1895**), 547–549.
—— Sur l'analyse spectrale des gaz dégagés par divers minéraux. Paris, Ac. Sci. C. R., 120, **1895**, 1103–1104.
—— Observations of sun-spot spectra, 1879–94. Roy. Soc. Proc., 57, **1895**, 199–201.
—— On the new gas obtained from uraninite. Roy. Soc. Proc., 58, **1895**, 67–70, 113–119, 192–195; 59, **1896**, 4–8, 342–343.
—— On the photographic spectrum of the great nebula in Orion. [1894.] Phil. Trans. (A), 186, **1896**, 73–91.
—— On the gases obtained from the mineral eliasite. [1895.] Roy. Soc. Proc., 59, **1896**, 1–3.
—— On the variable stars of the δ Cephei class. [1895.] Roy. Soc. Proc., 59, **1896**, 101–106.
—— The story of helium. [1896.] Nature, 53 (**1895–96**), 319–322, 342–346.
—— The shifting of spectral lines. [1896.] Nature, 53 (**1895–96**), 415–417.
—— The total eclipse of the Sun. Nature, 54 (**1896**), 197–199.
—— The eclipse of the Sun. Nature, 54 (**1896**), 395–400, 418–421, 441–445.
—— The total eclipse of the Sun, April 16th, 1893. Report and discussion of the observations relating to solar physics. [1896.] Phil. Trans. (A), 187, **1897**, 551–618.
—— Preliminary report on the results obtained in Novaya Zemlya with the prismatic camera during the eclipse of the Sun, August 9th, 1896. [1896.] Phil. Trans. (A), 189, **1897**, 259–263.
—— On the unknown lines observed in the spectra of certain minerals. [1896.] Roy. Soc. Proc., 60, **1897**, 133–140.
—— Celestial eddies. [1897.] Nature, 55 (**1896–97**), 249–253.
—— The question of carbon in bright line stars. [1897.] Nature, 55 (**1896–97**), 304–305, 341.
—— The approaching total eclipse of the Sun. Nature, 56 (**1897**), 154–157, 175–178, 318–321, 365–368, 392–395, 445–449.
—— On the iron lines present in the hottest stars. Roy. Soc. Proc., 60, **1897**, 475–476.
—— On the chemistry of the hottest stars. Roy. Soc. Proc., 61, **1897**, 148–209, 213.
—— Further observations of enhanced lines. Roy. Soc. Proc., 61, **1897**, 441–444.
—— On the classification of stars of the δ Cephei class. Roy. Soc. Proc., 61, **1897**, 445–455.
—— The total solar eclipse of August 9, 1896. Report on the Expedition to Kiö Island. [1897.] Phil. Trans. (A), 190, **1898**, 1–21.
—— On the appearance of the cleveite and other new gas lines in the hottest stars. [1897.] Roy. Soc. Proc., 62, **1898**, 52–67.
—— The total eclipse of the Sun. [1898.] Nature, 57 (**1897–98**), 342–344.
—— The chemistry of the stars. [1898.] Nature, 59 (**1898–99**), 32–36.
—— Preliminary note on the spectrum of the corona. [1898–1900.] Roy. Soc. Proc., 64, **1899**, 168–170; 66, **1900**, 189–192.
—— A simple spectroscope and its teachings. [1899.] Nature, 59 (**1898–99**), 371–373, 391–393.
—— The chemistry of the stars in relation to temperature. [1899.] Nature, 59 (**1898–99**), 463–466.
—— The present standpoint in spectrum analysis. [1899.] Nature, 59 (**1898–99**), 585–588.
—— On spectrum series. Nature, 60 (**1899**), 368–370, 392–396.
—— On the distribution of the various chemical groups of stars. Nature, 60 (**1899**), 617–620; 61 (**1899–1900**), 8–11.
—— The methods of inorganic evolution. [1899.] Nature, 61 (**1899–1900**), 129–131, 296–298.
—— The great Paris telescope. [1899.] Nature, 61 (**1899–1900**), 178–181.
—— Total eclipse of the Sun, January 22, 1898. Preliminary account of the observations made by the Eclipse Expedition and the officers and men of H. M. S. *Melpomene* at Viziadrug. Roy. Soc. Proc., 64, **1899**, 27–42.
—— Note on the enhanced lines in the spectra of α Cygni. Roy. Soc. Proc., 64, **1899**, 320–322.
—— On the order of appearance of chemical substances at different stellar temperatures. Roy. Soc. Proc., 64, **1899**, 396–401.
—— On the chemical classification of the stars. [1899.] Roy. Soc. Proc., 65, **1900**, 186–191.
—— Note on the spectrum of silicium. [1899.] Roy. Soc. Proc., 65, **1900**, 449–452.
—— Preliminary table of wave-lengths of enhanced lines. [1899.] Roy. Soc. Proc., 65, **1900**, 452–461.
—— The Piscian stars. [1899.] Roy. Soc. Proc., 66, **1900**, 126–140.
—— The Eclipse Expedition at Viziadrug. [1900.] Nature, 61 (**1899–1900**), 229–233, 249–252.
